

## AWMA FloodFree Products

AWMA Pty Ltd are an Australian owned and operated specialist supplier of flood protection barriers and flood doors. The FloodFree range of products are designed and manufactured in Australia to meet Australian conditions. All equipment is designed and manufactured in accordance with all relevant standards in accordance with AWMA's documented ISO 9001:2015 quality system.

Every FloodFree product is custom designed to meet site specific requirements and to withstand flood levels nominated by the relevant authorities. AWMA FloodFree products are designed to help mitigate the risk of property damage during a flood. The effectiveness of the product is directly related to the proper installation, operation and maintenance of the product. Failure to properly maintain your product will affect performance and may reduce the overall effectiveness of your flood mitigation system.

AWMA recommends that the owner implement a regular preventative maintenance program in accordance with the supplied Operations and Maintenance Manual.

AWMA recommends that a flood readiness plan be developed, with training performed to ensure the barrier will/can be activated during times of potential flooding. It is also recommended that a trial deployment test be undertaken at least every 6 months to ensure you are prepared in the event of an emergency and that your barrier remains in full working order.
